

Weekend Away 2024

*What's in Your Hallway?*

\$80

1/12th Scale Project with Angie Perry

Let your imagination run free with this project! It is one outer box and one stair case but has 2 sets of internal walls (which can be decorated outside the box on a flat surface), 2 hand rails and newel posts for the stairs which can be decorated to match and 2 scenery boxes to coordinate with the action indoors. PLUS there is enough skirting board, and capping to complete the 2 sets of walls. You provide your own wallpaper, flooring and whatever else you need to furnish the space.

Maybe you would like to have a room which can be decorated to match the seasons and which doesn't take up as much space as 2 (or more) rooms would. Or maybe you are someone who, like me, can't make up your mind how you would like to furnish a room box. Here is your chance to do two completely different looks in one space.

Below is my example of how I have decorated mine. On the left is a birthday party and on the right the same room has been decorated for Halloween. I have just changed the walls, hand rail, floor and the decorations. It takes only a few minutes to change everything over once its built. So I am all set for Halloween in October and the grandkids' birthdays the rest of the year!
