

What's in Your Fishing Shack?

\$150

Jan Stillard

1/48th scale

The shack has laser cut floors and 3D printed wall and roof frames. It has a main room, mezzanine bedroom and bathroom/laundry in an added room. The old tin roof adds to the ramshackle look.

A pier joins a veranda area where a row boat is moored.

Everything shown is included except the landscape, but Jan will run 2 workshops in the new year so you can make all the extras before the weekend.

If you want to make a cosy renovated shack, Jan will give other instructions and exchange items for modern furniture.

Instructions with photos will show you how to set your shack into a landscape with the pier over a creek.
