

What's on your Christmas Tree?

\$160

Jan Stillard

1/48th scale

The laser cut wooden tree has 3 floors.

A little train goes around the top with 4 rooms in the middle – master, girl and baby bedrooms plus a toy room. The ground floor is split between inside and outside.

It sits on a base so it can be rotated.

Everything shown is included. Jan will run a couple of workshops in the new year so you can get started on the accessories.

All furniture can be swapped for a different style.

Before the weekend Jan will send copies of all the wallpapers and rugs used in hers so you will have sizes to design/choose your own.
