

What's in your Art Deco Apartment?

Thinking of making the move to 1/48 scale?
This is a great project to start with as it is not difficult and will easily be completed over the weekend.

The apartment has a bedroom area at the rear with a lounge area comprising seating, a bar and chaise. The windows overlook a city skyline with lights behind. The frame has a mirror backing which says "Art Deco"

Cost is \$110 which includes the laser cut walls and all the 3D printed components, leaving lots of ideas for goodie bags.

- Learn how to use simple LED lighting.**
- How to use flocking powder as carpet and furnishings.**
